

Press release

Marlenheide, 28 January 2025

One document – everything you need

PFERD presents the 25th edition of its Tool Manual – more innovative and versatile than ever

Tailored to the needs of customers, the new edition of the PFERD Tool Manual is an indispensable guide when it comes to processing surfaces. The 25th edition offers users the updated PFERD product range and also contains a wealth of order-related information. In addition, the Manual includes many safety tips and recommendations for optimising the use of PFERD tools.

And that's not all: The TM, which is published exclusively in digital form, links the catalogue with the **PFERDSHOP**, enabling customers to purchase tools directly from the manufacturer or from a host of PFERD partner retailers with just a few clicks.

The revised version also sets new standards in terms of expertise. The opening pages feature QR codes that lead to an extensive knowledge section with information for customers on how to work even more effectively with materials and tools.

The Tool Manual remains a globally recognised standard reference. Its uniform structure makes it possible to implement updates in all versions very quickly. In future, the Tool Manual will be updated annually in all relevant markets.

With the new edition of the Tool Manual, PFERD is underlining its high quality standards with respect to its catalogue. You can find the current edition [here](#).

About PFERD

August Rüggeberg GmbH & Co. KG – PFERD Tools (www.pferd.com) is among the leading companies that manufacture tools for work on surfaces and metal cutting. With a heritage that dates back more than 220 years, the family-run business, based in Marienheide, manufactures its products across nine different production facilities and its current portfolio includes over 11,000 tools.
