High stock removal rate and efficiency – ALLROUND now available as small burr

[pi-allround-kleinfrässtifte.jpg]

ALLROUND is the name of PFERD's tungsten carbide burr range for universal use. And since it was launched in 2018, ALLROUND has been very popular, according to Thomas Plömacher, the product manager, etc. for tungsten carbide burrs at PFERD, the specialists for work on surfaces. 'The ALLROUND cut features all the advantages of the proven 3 PLUS cut, but exceeds it by up to 30% when it comes to stock removal rate on steel: for example when milling out, smoothing out, deburring, cutting out holes, or work on surfaces and welded seams,' said Plömacher. This extra performance shows up as significant time savings and high economic efficiency. And ALLROUND burrs enable comfortable working with reduced vibration and less noise.

The range has now been expanded to include small burrs. A total of 20 items in eight forms (ZYAS, KUD, WRC, B, SPG, RBF, SKM and TRE) and burr diameters of 3 mm and 6 mm on a 3-mm shank round out the range.

'We are pleased to be able to offer the extremely successful ALLROUND cut as a small burr now,' added Plömacher. 'The high level of demand for the universal all-rounder in small dimensions is overwhelming.'
